

OPEN SCIENCE TEAM AGREEMENT

WHAT IS OPEN SCIENCE?

Open Science is the principle and practice of making research products and processes available to all, while respecting diverse cultures, maintaining security and privacy, and fostering collaborations, reproducibility, and equity. -[NASA TOPS](#)

WHAT IS THE OPEN SCIENCE TEAM AGREEMENT?

An Open Science Team Agreement gives researchers and other stakeholders the tools they need to understand and advocate for open science practices at a broader scale - within their laboratory, department, or the broader community.

WHAT DOES THE OPEN SCIENCE TEAM AGREEMENT COVER?

A team's commitment to open science practices in the areas of:

- Authorship and Collaboration
- Articles and Research Materials
- Data and Code
- Communication and Impact

WHERE TO START

Here are the steps to take when creating an Open Science Team Agreement:

1. Assemble your team
2. Download a free copy of the Open Science Team Agreement Template
3. Tailor the agreement to reflect your team's values by working together
4. Share your revised agreement with others
5. Establish a schedule to review the agreement periodically.
